The Nongovernmental International Panel on Climate Change (NIPCC) is what its name suggests: an international panel of nongovernment scientists and scholars who have come together to understand the causes and consequences of climate change.

Climate Change Reconsidered

Anthropogenic Climate Change. Anthropogenic climate change refers to the production of greenhouse gases emitted by human activity. By examining the polar ice cores, scientists are convinced that human activity has increased the proportion of greenhouse gases in the atmosphere, which has skyrocketed over the past few hundred years.

Anthropogenic Climate Change | Global Greenhouse Warming

Promoting sustainable development and combating climate change have become integral aspects of energy planning, analysis and policy making. Because energy accounts for two-thirds of total greenhouse gas emissions and 80% of CO₂, any effort to reduce emissions and mitigate climate change must include the energy sector.. Global energy-related CO₂ emissions grew by 1.4% in 2017, reaching a ...
