Advances In Agronomy Volume 111

Urea is a small molecule and natural substrate of urease. On the other hand, as indicated by crystallographic studies, the enzyme is quite flexible and is able to bind big scaffolds. Therefore, compounds containing fragment of urea or thiourea are of natural choice for the construction of inhibitors of this enzyme.

Recent advances in design of new urease inhibitors: A review

Sampling and analysis or visual examination of soil to assess its status and use potential is widely practiced from plot to national scales. However, the choice of relevant soil attributes and interpretation of measurements are not straightforward, because of the complexity and site-specificity of soils, legacy effects of previous land use, and trade-offs between ecosystem services.

Science in the medieval Islamic world was the science developed and practised during the Islamic Golden Age under the Umayyads of Córdoba, the Abbadids of Seville, the Samanids, the Ziyarids, the Buyids in Persia, the Abbasid Caliphate and beyond, spanning the period roughly between 786 and 1258. Islamic scientific achievements encompassed a wide range of subject areas, especially astronomy ...

Forest farming is the cultivation of high-value specialty crops under a forest canopy that is intentionally modified or maintained to provide shade levels and habitat that favor growth and enhance production levels. Forest farming encompasses a range of cultivated systems from introducing plants into the understory of a timber stand to modifying forest stands to enhance the marketability and ...

Chickpea is a protein rich crop and so proper maintenance of soil fertility is necessary to harvest its full potential. The benefits that chickpea can derive from PGR and S application may be related to the bioavailability of substrate carbon as well as release of other nutrients.

Chickpea responses to application of plant growth ...

Abstract: The objective of this work was to assess the effects of 1-methylcyclopropene (1-MCP) on traits related with biological nitrogen fixation on 'BRS 268' soybean (*Glycine max*) subjected to water restriction. Plants were either exposed to drought between 32 (R 2) and 47 (R 3) days after sowing (DAS) or kept well-watered, in combination with exposure or not to 1-MCP.

Biological nitrogen fixation in soybean under water ...

Pharmaceutics, an international, peer-reviewed Open Access journal. In the present study, we developed a sonoporation system, namely "direct sonoporation", for transfecting the peritoneum from a defined surface area to avoid systematic side effects.

2. Controlled Delivery of Agrochemicals by Polymeric Matrices. An important point in agriculture is to supply nutritional needs of plants, which ranges from macronutrients such as N, P, K, Ca, Mg and S to micronutrients such as B, Cl, Co, Cu, Fe, Mn, Mo, Ni and Zn [9]. However, these nutrients are often not available in the environment at sufficient levels for good plant growth.

Characteristics of Malting Barley Grain. Barley grain that is clean, bright yellow-white, plump, thin-hulled, medium-hard, and uniform in size is generally suitable for food uses and preferred for

pearling (Pomeranz 1974). Grain hardness is an important characteristic of barley because it determines the pearling and subsequent end-use quality of barley.

Barley for Brewing: Characteristic Changes during Malting ...

Meals with low glycemic index (GI) may suppress short-term appetite and reduce subsequent food intake compared with high-GI meals. However, no meta-analysis has been conducted to synthesize the evidence. This meta-analytic study was conducted to assess the effect of high- and low-GI breakfast on subsequent short-term food intake. Trials were identified through MEDLINE, EMBASE, Web of Science ...

Effect of Glycemic Index of Breakfast on Energy Intake at ...

10th WORLD CONGRESS OF EWRA on Water Resources and Environment "Panta Rhei" 5-9 July 2017, Athens (Greece) Announcement . As known, all the papers presented at the 10th World Congress of EWRA will appear in the Proceedings which will be published as special issues of the journal EUROPEAN WATER.

EWRA - European Water Resources Association

This paper discusses the effects of trees on soil fertility, with a focus on agricultural systems in Amazonia. Relevant literature concerning the effects of trees on soil physical and chemical properties in tropical, subtropical, and temperate regions is reviewed, covering both natural ecosystems and agroecosystems. Soil carbon, in the form of organic matter, is considered as an indicator of ...
