Teaching the Count-On Strategy for Addition Number Facts

When practicing count-ons start with the largest number and count up. For example: $5+3$. Say 5 and then count-on 6,7,8. Turn-around facts are those facts in which the numbers are just turned around. For example $5+3=8$ and $3+5=8$. There are 19 zero facts and their turn-arounds. A zero in an addition fact makes no change.

Field Elementary School: Addition Fact Strategies

It is actually a shortened version of "counting on from a given number." That is a challenging task in my kindergarten classroom and it can mark the progress of a student's number sense. With lots of practice and understanding, they move from counting all of the objects to starting with a known quantity and counting on.

What Does 'Counting On' Mean? - MathFour

Counting on and counting back: For facts such as $9+1$ or $7+2$, you can count on from the greater number. Similarly, for facts such as $6 - 1$, you can count back. (Counting back is often harder to master than counting on.) Doubles and near doubles: If you have two groups of 8 objects, you have double 8, or 16, objects.

MathSteps: Grade 1: Addition and Subtraction Facts to 20 ...
