

Data Data Everywhere Bringing All The Data Together For Continuous

Data Data Everywhere Bringing All

Catalog data where it lies. Today's enterprises are using more data than ever before from a variety of sources. As these files are typically located in disparate databases and other locations across the company, it has historically been incredibly difficult to create an all-encompassing and searchable resource of metadata from all of these sources.

Unifi Data Catalog - AI Powered Data Governance, Search ...

"Big data" is a field that treats ways to analyze, systematically extract information from, or otherwise deal with data sets that are too large or complex to be dealt with by traditional data-processing application software. Data with many cases (rows) offer greater statistical power, while data with higher complexity (more attributes or columns) may lead to a higher false discovery rate.

Big data - Wikipedia

Learn about Open Data Week! Open Data Week is organized and produced by the NYC Open Data Program and BetaNYC. This week-long event series takes place during the first week of March to celebrate New York City's Open Data Law, which was signed into law on March 7, 2012.
