A dragon is a large, serpent-like legendary creature that appears in the folklore of many cultures around the world. Beliefs about dragons vary drastically by region, but dragons in western cultures since the High Middle Ages have often been depicted as winged, horned, four-legged, and capable of breathing fire. Dragons in eastern cultures are usually depicted as wingless, four-legged ...

Though not as well-known as the unicorn, the Chollima is yet another mythical creature commonly found in Chinese classics. The horse's name translates to "thousand-mile horse," referring to its ability to gallop one thousand li (311 miles) in a day. When North Korea and South Korea came to a ceasefire agreement in the 1950s, President Kim il Sun barked at people to rebuild at Chollima speed.

Cryptozoology, the study of "hidden animals", concerns itself with animals whose existence has not yet been recognized by mainstream science. These animals, known as "cryptids", are often the stuff of legends, written off as myths or elaborate hoaxes. Some famous cryptids are Bigfoot, the Loch Ness Monster, and El Chupacabra, all of which remain shrouded in mystery.

Doctor Strange has one of these moments in a Marvel Adventures title. ("Such magnificent power. It could destroy us at whim."); Fluttershy's comment that "Nature is so fascinating!" from a My Little Pony: Friendship is Magic (IDW) comic book has achieved memetic status on the internet. Now people are posting it combined with all kinds of abhorrent nature facts.
