Purple is a color intermediate between blue and red. It is similar to violet, but unlike violet, which is a spectral color with its own wavelength on the visible spectrum of light, purple is a secondary color made by combining red and blue. The complementary color of purple in the RYB color model is yellow.. According to surveys in Europe and North America, purple is the color most often ...

When it comes to color, there may be options in your closet that shouldn't have made the qualifying race. Wearing the wrong color can make you ill. Sallow, ashen, and muddy complexions are all signs of color contamination. And the only protection against chromatic allergies is color composition cognizance, specifically, knowing your color category.

Photographic processing or development is the chemical means by which photographic film or paper is treated after photographic exposure to produce a negative or positive image.Photographic processing transforms the latent image into a visible image, makes this permanent and renders it insensitive to light.. All processes based upon the gelatin-silver process are similar, regardless of the film ...

Colors and Frequenices. Blue. Blue is a color, the perception of which is evoked by light having a spectrum dominated by energy with a wavelength of roughly 440-490 nm. It is considered one of the additive primary colors. On the HSV Color Wheel, the complement of blue is yellow; that is, a color corresponding to an equal mixture of red and green light.
