The following lesson ideas are intended to give teachers a head start in planning classroom activities during Brain Awareness Week. However, these ideas can be used anytime that a class is studying the nervous system. These lessons can be rearranged according to your specific objectives and time constraints.

**Neuroscience for Kids - BAW Lesson Plan**

Introductory Activity Let students know today's lesson is about the brain. Ask students to brainstorm some facts they know about the human brain. Write down their answers and discuss. Keep them ...

**Journey into the Brain ~ Lesson Activities | The Human ...**

This lesson covers just the tip of the iceberg when it comes to the brain and behavior, but understanding this information establishes a solid foundation for future study. If you feel that you have fully studied the information in this lesson, then feel free to move on to lesson four .

**Lesson Three: Brain and Behavior - Verywell Mind**

The type of lesion depends upon the type of insult that the brain receives. Aging: Some lesions occur as a result of aging with loss of brain cells as they naturally age and die. If enough cells die, atrophy can occur and brain function decreases. This may present with symptoms of loss of memory, poor judgment,...

**Brain Lesions (Lesions on the Brain) - MedicineNet**

Use this senses lesson plan to show students some fun brain activities and teach them more about brain functions such as memory, taste, sight and touch. Introduction: It is said that as far back as 10000 years ago people had a strong awareness of the importance of the head and brain.

**Fun Brain Activities - Senses Lesson Plan for Kids, Memory ...**

Brain lesions (lesions on the brain) refers to any type of abnormal tissue in or on brain tissue. Major types of brain lesions are traumatic, infectious, malignant, benign, vascular, genetic, immune, plaques, brain cell death or malfunction, and ionizing radiation. Other chemicals and toxins have been associated with brain lesions as well.
