Business Class is found mostly on international routes and planes that are configured for long-haul travel. This class of service offers significantly more comfort and amenities than standard Economy, Premium Economy, and Domestic First Class, which usually include:

Long-haul Business Class Comparison Chart - SeatGuru

In aviation, the flight length is defined as the distance of a flight. Commercial flights are often categorized into long-, medium- or short-haul by commercial airlines based on flight length, although there is no international standard definition and many airlines use air time or geographic boundaries instead. Route category lengths tend to define short-haul routes as being shorter than 600 ...

As a new-generation freighter derived from Airbus' proven A330 jetliner family, the A330-200F offers highly efficient operation with less noise and emissions than the ageing fleets of mid-sized cargo aircraft used in worldwide service today.

A330-200F - Airbus

Fuel economy in aircraft is a measure of how much fuel an aircraft, or a fleet of aircraft of mixed types, needs to operate in relation to a service provided (i.e. number of passengers or ton of freight) and the distance between points of travel. It can be expressed in several ways, for example by the litres of fuel consumed per passenger per kilometer.
