BMS Manual - DOFGROUP

Customer relationship management (CRM) is an approach to manage a company's interaction with current and potential customers. It uses data analysis about customers' history with a company to improve business relationships with customers, specifically focusing on customer retention and ultimately driving sales growth. One important aspect of the CRM approach is the systems of CRM that compile ...

Customer relationship management - Wikipedia

Risk management is the identification, evaluation, and prioritization of risks (defined in ISO 31000 as the effect of uncertainty on objectives) followed by coordinated and economical application of resources to minimize, monitor, and control the probability or impact of unfortunate events or to maximize the realization of opportunities. Risks can come from various sources including ...

A leeway for unplanned situations. A buffer gives project managers a leeway when unforeseen events occur and is often associated with scheduling in project management. A buffer can be temporal, financial or qualitative in nature, i.e. you have additional time, money or people available for difficult project phases. Buffers can be assigned either to the whole project or to individual activities ...

What is a buffer in project management? - InLoox

Management Principles developed by Henri Fayol: DIVISION OF WORK: Work should be divided among individuals and groups to ensure that effort and attention are focused on special portions of the task. Fayol presented work specialization as the best way to use the human resources of the organization. ...
