Well organized and easy to understand Web building tutorials with lots of examples of how to use HTML, CSS, JavaScript, SQL, PHP, Python, Bootstrap, Java and XML.

How TO - Position Text Over an Image - W3Schools

The term alternative text, as used in this article, refers to the text equivalent for an image, regardless of where that text resides. It does not refer solely to the alt attribute of the image tag. Alt attribute will be used when referring to the attribute itself, which often will, but does not exclusively, contain the alternative text.

How To Add Text Blocks Over an Image - W3Schools

An image (from Latin: imago) is an artifact that depicts visual perception, such as a photograph or other two-dimensional picture, that resembles a subject—usually a physical object—and thus provides a depiction of it. In the context of signal processing, an image is a distributed amplitude of color(s).

Alternative text is text associated with an image that serves the same purpose and conveys the same essential information as the image. In situations where the image is not available to the reader, perhaps because they have turned off images in their web browser or are using a screen reader due to a visual impairment, the alternative text ensures that no information or functionality is lost.

Label - Simple Text Label Basic Labels Creating a font image using a "label:" image, is the more typical way of drawing a font quickly in ImageMagick. The biggest advantage is that generates its own canvas according the current "-background" and "-fill" color settings, which is sized to match the drawn text. For example here is a typical generated label.
