### **The quantum mind of Stuart Hameroff Greg Taylor**

The quantum mind or quantum consciousness group of hypotheses propose that classical mechanics cannot explain consciousness. It posits that quantum mechanical phenomena, such as quantum entanglement and superposition, may play an important part in the brain's function and could contribute to form the basis of an explanation of consciousness.

### **Quantum mind - Wikipedia**

The quantum mind theory is founded on the premise that quantum theory is necessary to fully understand the mind and brain, particularly concerning an explanation of consciousness. This is considered a minority opinion in science, although it does have the support of the well-known mathematical physicist Sir Roger Penrose .

Quantum Mind. Theoretical physicist Roger Penrose and anaesthesiologist Stuart Hameroff collaborated to produce the theory known as Orchestrated Objective Reduction (Orch-OR). Penrose and Hameroff initially developed their ideas separately, and only later collaborated to produce Orch-OR in the early 1990s.

### **Quantum Consciousness and its Nature In Microtubules. Dr. Stuart Hameroff.**

The nature of consciousness remains deeply mysterious and profoundly important, with existential, medical and spiritual implication. We know what it is like to be conscious - to have awareness, a conscious 'mind', but who, or what, are 'we' who know such things? How is the subjective nature of phenomenal experience - our 'inner life' - to be explained in scientific terms?

Stuart Hameroff, MD, is an anesthesiologist and professor at the University of Arizona known for his promotion of the scientific study of consciousness, and his speculative theories of the 'mechanisms' of consciousness.. His early research suggested to him that part of the solution to the problem of understanding consciousness may lie in understanding the operations of microtubules in brain ...
